		<p>Dynamics is a theory that explains everything about people’s behaviour, attitude, actions and reactions.</p> <p>By exploring and describing the core intelligences and deep thinking systems that flow beneath what we believe and do, the model offers a profoundly incisive, dynamic perspective on complex matters such as:</p> <p>How people think about things (as opposed to “what” they think)</p> <p>Why people make decisions in different ways</p> <p>Why people respond to different motivators</p> <p>Why and how values arise and spread as well as the nature of CHANGE and how to UNDERSTAND DIVERSITY.</p> <p>Humanity is facing up to some hard truths. We have some powerful choices to make. Many will be political, some religious, and others educational. All will be predicted on the Spiral, whether we recognize it at the time or not. A little knowledge is a dangerous thing, but ignorance is worse. If you are now awakening to Spiral Dynamics, you will hold a tool to a versatile model for understanding how and why change does or does not and perhaps should not occur.</p>
13-19	<p style="text-align: center;">TDCI RIDE The Robben Island Diversity Experience</p>	<p>RIDE takes a deep dive into the narratives, dynamics, thinking patterns and value systems, that inform and direct individual, team and societal functioning. It is an intense 5-day experiential journey in which delegates are exposed to how individual and collective thinking systems, identity formation, power relations and relatedness influence our conception and experience of ourselves and the ‘other’.</p> <p>RIDE utilizes three powerful, interlocking ‘lenses’ (Narrative, Spiral Dynamics, and System Psychodynamics) to enable a deep understanding of the conscious and unconscious, rational and irrational, as well as overt and covert factors that inform our individual and collective narratives, mental models, thinking patterns, value systems, relatedness and relations, as well as power and other interactional dynamics.</p> <p style="text-align: center;">RIDE Value Proposition:</p> <p>The attainment of a deeper understanding of diversity & the forces that impact on individual, group and organisational dynamics. ^[L]_[SEP]</p> <p>Being sensitised to how our individual and collective stories construct meaning, and thereby structure our world. ^[L]_[SEP]</p> <p>Becoming conscious of the value systems and thought patterns that inform our adaptive strategies and engagement with the world. ^[L]_[SEP]</p> <p>Recognizing the unconscious, irrational, and covert dynamics that drive individual and collective behaviour. ^[L]_[SEP]</p> <p>To learn how diversity - individually and collectively can be managed in appropriate ways. ^[L]_[SEP]</p>
